increase output

4-5x jump
in detections development

STREAMLINE SECOPS. MAKE YOUR CLIENTS MORE SECURE.

Win back your time and margins with context-driven reporting, a highly scalable platform, and the tools you need to drive your clients' constant progress.

⬡ Threat Intel   ⬡ SnapAttack   ⬡ Red Team   ⬡ Blue Team

⬡ Continuous validation with MITRE ATT&CK coverage mapping

01. research

Understand the art of an attack.
Operationalize threat intelligence.

⬡ Threat Intel

⬡ Attack Library

⬡ Detection Repo

02. write

Combat attacks with a systematic, scientific approach.

⬡ Attack Capture Lab

⬡ No-Code Detection Builder

at a glance view of protection

MITRE ATT&CK COVERAGE MAP

04. deploy

Deploy to your existing tools with confidence.

⬡ One-Click Deploy

⬡ Universal Detection Translator

03. validate

Put your new defenses to the test.

⬡ Adversary Emulation

⬡ Breach Attack Simulation

Simplify coverage across client environments – regardless of tooling.

stay ahead of the threat

Scale SecOps across clients efficiently.

→ Our integrated view across data sources offers context and the ability to communicate across cyber defense teams and deploy detections among different tools.

Accelerate and mobilize quickly when your clients ask about the latest threat of the week.

→ When new threats are disclosed, automatically know whether they'll be detected and if there are multiple points of coverage with the ability to immediately deploy threat detections into the field.

Improve resource effectiveness and margins.

→ Eliminate alert fatigue and focus your SOC and IR teams on critical needs - and make them more efficient than ever with our collaborative, integrated workflow.

Streamline and standardize client reporting with dashboards.

→ Give teams the ability to create, translate, deploy, validate detections across their stack without having to know syntax for a myriad of security tools, enabling them to collaborate seamlessly.

Level up junior analysts while they're on the job.

→ Enable your teams to quickly understand any given attack technique by observing the adversary, their victim and the true positive evidence left behind

Know you have your entire client base covered.

→ Visually quantify your MITRE ATT&CK coverage for a specific actor or threat to deployed detections and gain immediate perspective on your actual detection coverage mapped against ATT&CK.
