

# THREAT-INFORMED CYBER OPERATIONS.

powered by the world's first continuous purple teaming platform

## Built to remove barriers to proactive cybersecurity and threat-informed defense.

Whether you're an analyst or a CISO, a red teamer or a blue teamer, SnapAttack unlocks the potential of your security operations by removing barriers to efficient, effective, and integrated threat detection.

accelerate scale

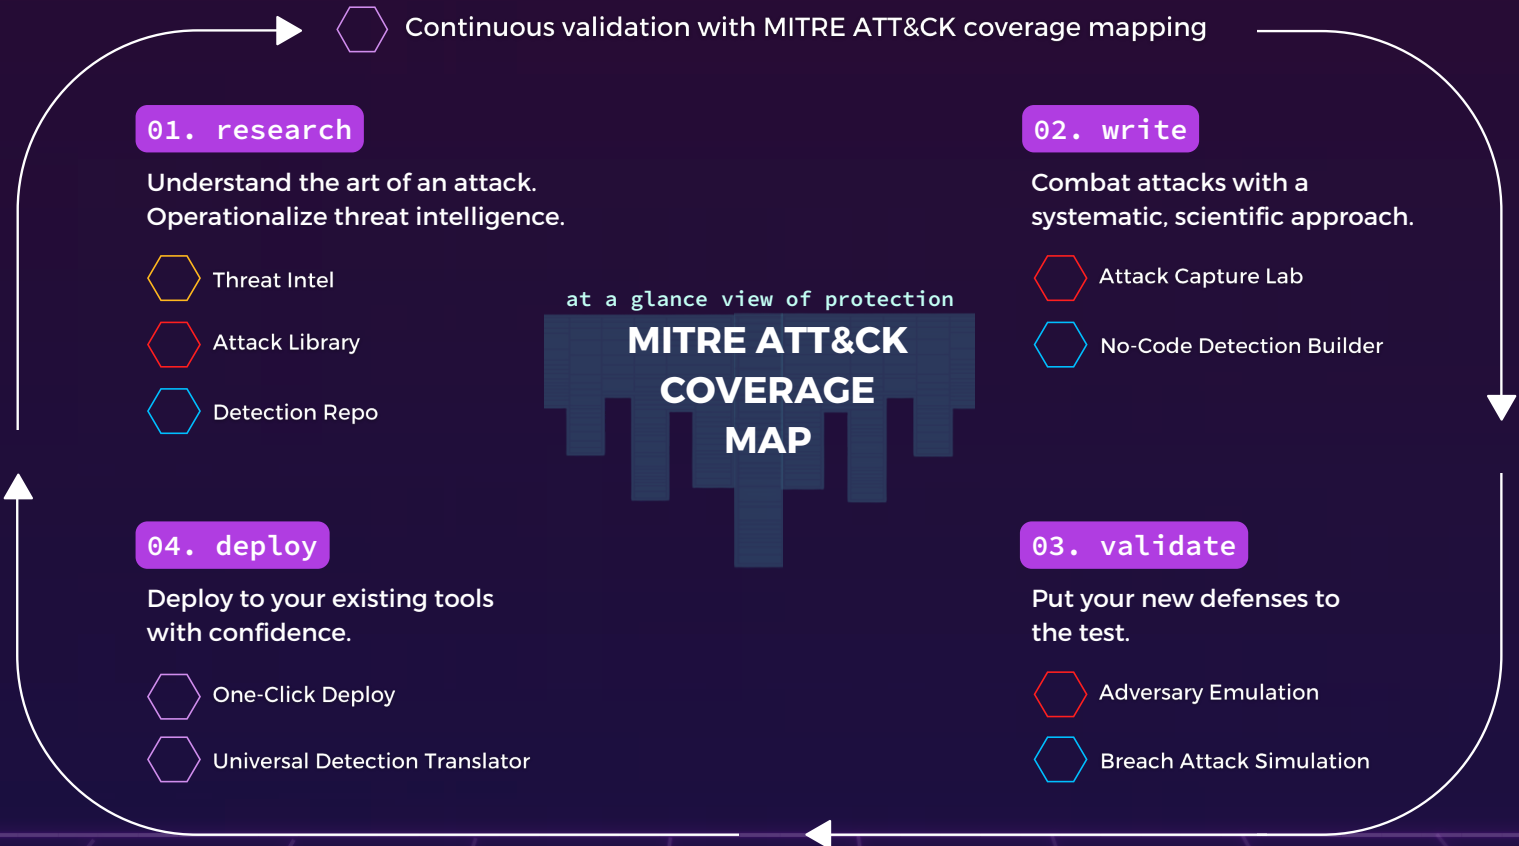

**98% faster**  
threat hunting process

drive collaboration

**4-5x jump**  
in detection development

enhance confidence

**86% decrease**  
in vulnerability exposure period

Answer the question  
**"Are we protected?"**  
with confidence.

**STAY AHEAD OF THE THREAT.  
LET THE HUNTERS HUNT.**

- **More coverage, less work**
- **False positive reduction, true positive validation**
- **Power up your existing SIEM or EDR**
- **Measure security, manage prioritization**
- **Works at any level of maturity - even if you don't have a red or blue team**
- **Visualize, quantify, & improve MITRE ATT&CK coverage**

**for cisos**

Enhance your maturity, unlock the potential of your team and tools, and bring the fight to the adversary.

**for soc managers**

Visualize your coverage against any given threat. Prioritize team effort to stop attacks earlier in the kill chain.

**for threat hunters**

Streamline your threat hunts and move from reactive to proactive.

**for blue teams**

Automate attack sessions and deploy any detection to any environment with ease.

**for red teams**

Translate your detections and processes to immediately mobilize the blue team.
